

WORK CUBE®

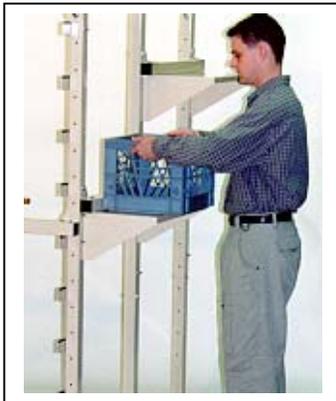

WC-100 Standard Equipment

Overhead Activity Module – mounts across top of **WORK CUBE®** frame for overhead assembly and disassembly tasks. Large center hole provides easy access to top surface for full overhead extension and occluded tasks.

Bilateral Weight Carrier/Progressive Lifting Brackets - provide a structured progressive lifting activity. Carrier holds 100 pounds of **WORK CUBE®** Weight Blocks. Stepped lifting brackets are designed for patient safety and convenience. Lifting range is from 13 to 69 inches.

Heavy Duty Lift-Off Shelves (2 ea.) – adjust easily from 9 to 65 inches for use as work surface or versatile lifting platform for boxes or crates. Rated for 150 pound loads.

Occluded Vision Module – allows assembly and disassembly tasks at any height from floor level to overhead. Use with the Overhead Activity Module for more complex simulation tasks.

Lift-Off Tubes – One each 25 inch and 48 inch lift-off tube for simple lifting activities or simulation work.

Weight Blocks with Storage Bucket – 100 pounds of weight blocks for lift/carry tasks with poly bucket.

Five-Piece Tool Kit – Combination wrench, ratchet, socket, and nut driver with bucket.

Hardware Package – Nuts, bolts, washers, and spacer rings for module mounting and nut-and-bolt assembly.

Safety Floor Mats – Skid-free floor surface for patient safety.
